## RELEVANT EXPERIENCE

### Card-Monroe Corp

May 2024 - August 2024

*Software Engineering Intern*

Chattanooga, TN

- Created working HMI prototypes, using Vue.js and .NET Core, to help improve the company's IoT capabilities, enhancing technological advancement.
- Developed a Python application to calculate motion points, enabling smooth acceleration of machine components.
- Collaborated with users to create functional, user-first UI components, enhancing the user experience of our devices.

### Card-Monroe Corp.

May 2023 - August 2023

*Software Engineering Intern*

Chattanooga, TN

- Researched and developed new technologies and strategies using Javascript and Python to improve the software development life-cycle, resulting in more efficient project completion.
- Performed full-stack software development to create a React & .NET Core Web Application from scratch, which improved user interface and increased application performance.
- Collaborated with industry experts to enhance user experience and streamline operations within the manufacturing environment, leading to improved efficiency and user satisfaction.

### Card-Monroe Corp.

May 2022 - July 2022

*IT Intern*

Chattanooga, TN

- Managed Active Directory by creating user accounts, implementing group policies, and configuring security settings, which improved system security and user access efficiency
- Performed various Help Desk tasks, such as providing technical support to users, troubleshooting and resolving software and hardware issues, and managing IT inventory.

### Catoosa County Public Schools

May 2021 - May 2022

*Technology Intern*

Ringgold, GA

- Repaired and deployed a wide variety of devices, including Chromebooks, desktops, and laptops, by performing hardware and software repairs and configuring device settings, ensuring optimal performance.
- Verified all devices were fully functional before deployment, reducing user downtime and enhancing productivity.

### Whitfield County Public Schools

July 2020 - August 2020

*IT Intern*

Dalton, GA

- Repaired thousands of Chromebooks, diagnosed and corrected a wide range of technical issues, performed hardware and software repairs, and ensured all devices were fully functional before returning them to users.
- Contributed effectively as a team member in a team of interns, supporting the repair process, participating in training, and mentoring new team members, resulting in a consistent and efficient workflow.

## CAMPUS & COMMUNITY INVOLVEMENT

### Student Alumni Council

January 2023 - Present

*2024 Member of the Year, Marketing Committee, Traditions Committee*

Athens, GA

- Member of the Student Alumni Council at the University of Georgia, actively working towards promoting UGA traditions, fostering student philanthropy, and connecting students with alumni.
- Actively contributed and engaged in the planning and execution of various events hosted by the council such as the Class Ring Ceremony, Founders Day, Freshman Welcome, Homecoming, and Dawg Day of Giving.

### UGA Hacks

2024, 2025

*Competitor*

Athens, GA

- Competed in UGA Hacks 9, developing GoodGreek—a full-stack CRUD application using React, Bootstrap, and MySQL—within 36 hours to help share Greek-life philanthropy opportunities.
- Competed in UGA Hacks X, developing FinanceFriend—a GenAI application that delivers personalized finance advice from users' favorite pop-culture characters.

### Business Today International Conference

November 2024

*Attendee*

New York, NY

- Top 2% of applicants to Business Today's 50th International Conference
- Selected to participate in the conference and network with top business executives from Fortune 500 companies
